

FINAL EVALUATION

Harmony in diversity

ORGANIZATION

The organization was excellent and the atmosphere was warm. We always had enough time to enjoy the activities, yet also plenty of time to get to know one another and simply enjoy ourselves.

Furthermore, the schedule was consistently followed; if any changes did occur, we were informed in good time and offered an alternative.

IMPLEMENTATION

The training workshops and tasks were interesting and provided me with a different perspective and new knowledge; however, there wasn't enough explanation regarding how to work with young people or how this could benefit them. I think the tasks were excellent, but the training lacked a section explaining how and in what ways such workshops can help young people.

IMPROVEMENT

I think these workshops could be improved even further if there were more guidance on how to actually use the material with young people and the general public. After all, if we simply attend the workshops without grasping how to apply what we've learned in our own communities, then we haven't really achieved anything.

OUTCOMENTS

This project taught me that no matter that we are different and that we are from different countries, that we can cooperate nicely and learn from each other. What this project especially taught me is how carefully and in what way to talk and treat people who are not from your area. who don't know your jokes and haven't learned your behavior....

ACTIVITIES

In my opinion, the activities were interesting. It wasn't just endless talk about music or the same song over and over; we also had several tasks where we showcased our cultures through music, which I found wonderful. It could be a bit exhausting at times, but all in all, the workshops were fantastic.
